GUMBOVACC

Oral Powder

COMPOSITION:

Each 100gm oral powder contains:

Ammonium Chloride BP _____ 40 gm
Magnesium Sulphate BP _____ 23 gm
Sodium Sulphate BP _____ 23 gm

Sorbitol BP _____ 5 gm
Cranberry Extract _____ 2 gm
Tribulus terrestris extract _____ 2 gm
Excipients Q.S

DESCRIPTION:

Ammonium Chloride present in Gumbovac has a powerful diuretic function. Magnesium Sulphate & Sodium Sulphate has their strong purgative and laxative function by increasing the flow of water towards intestine, thus liquefies and softens the excrements for easy excretion from the body. Sorbitol supports the liver detoxification by stimulating the bile production. It also has an important role in lipid metabolism. Sorbitol is an alcoholic sugar which gives the instant energy to the bird so enhances the immune status of the bird.

INDICATIONS:

Gumbovac is strongly indicated for

- Nephritis
- Kidney & Liver disorder
- Detoxification
- Water Belly
- Dehydration
- Stress conditions like Imbalance Feeding, Heatstroke & Transportation etc.
