

NUTRI IMMUNE-40

Strong Immunity is a Gateway to Good Health

- ✓ Boosts Natural Immunity
- ✓ Enhances Vaccine Response
- ✓ Reduces Mortality Rate
- ✓ Promotes Healthy Growth
- ✓ High Anti-Microbial Protein Source

وائٹر بیماریاں

NUTRI IMMUNE-40

COMPOSITION:

Each 1 Liter of oral liquid contains:

Nucleotides	250 gm
Lysozyme	400 gm
Omega 3	50 gm
Vitamin E	100 gm
Selenium	0.5 gm
Zinc	40 gm
Copper	20gm

PACKAGING SIZE

1 Liter, 5 liter.

DOSAGE:

Prevention Dose: 1 ml in 6 liters of drinking water.

Treatment Dose: 1 ml in 4 liters of drinking water.

PRECAUTIONS:

Store in a cool, dark place.
Keep away from reach of children.

INDICATIONS:

What is a Nucleotide?

"A nucleotide is a type of chemical molecule that makes up DNA and RNA."

Adenine, cytosine, guanine, and thymine are the four nitrogenous bases of DNA. Instead of thymine, uracil is found in RNA. The genetic material of all known living creatures is made up of nucleotides in a chain.

Benefits Of Nucleotides

Addition of nucleotides enhance immunity, gastrointestinal development and promote the development of beneficial intestinal flora. Due to enhance gut health nucleotides improve growth and production in poultry. Nucleotides may reduce antibiotic usage in poultry.

Mode Of Action Of Lysozyme

- Lysozyme is a part of the innate immune system. The innate immune system is the body's first line of defense against infection. It includes Physical barriers, such as the skin, and chemical barriers, such as Lysozyme.
- Lysozyme is one of the body's chemical barriers against infection. Lysozyme works by breaking down the cell wall of bacteria.
- This helps to protect the body from infection.
- The innate immune system works to protect the body from infection. Lysozyme is one of the body's chemical barrier against infection.
- Lysozyme is an enzyme that is a part of the immune system and found fluids such as tears, saliva, and mucus.

Benefits Of Nucleotides

Addition of nucleotides enhance immunity, gastrointestinal development and promote the development of beneficial intestinal flora. Due to enhance gut health nucleotides improve growth and production in poultry. Nucleotides may reduce antibiotic usage in poultry.

Omega 3

Immunocompetence, skeletal, and gastrointestinal (GIT) development, fertility in poultry.

Vitamin E

- Greater resistance to heat stress.
- Strengthen immune response, including E. coli.
- Improved laying.
- Better hatch rate.
- Important for normal neurological functions.
- Increase the nutritional values of eggs and meat.
